

FERRAN BUIREU

Senior Software Engineer

fbuireu@gmail.com | +34 633 147 867 | [LinkedIn](#) | [GitHub](#)

SUMMARY

Senior Software Engineer with 10+ years of experience building production systems and leading architecture and delivery across multiple teams. Strong proficiency in React, Next.js, and TypeScript, with hands-on experience in Go, AWS, Elasticsearch, observability, performance tuning, and CI/CD automation. Proven track record designing scalable, data-intensive backend services and both client and server-side architectures with strong UX and operational quality. Experienced in mentoring senior engineers, driving engineering standards, and communicating effectively with technical and non-technical stakeholders up to the VP level.

RELEVANT PROFESSIONAL EXPERIENCE

Senior Software Engineer, Gartner Peer Community

March 2024 – Present

Gartner · Barcelona

- Own full-stack development and architecture of Gartner Peer Community — high-performance and traffic, SEO-critical platforms with complex data handling — built with React, Next.js, TypeScript, Go, and Node.
- Drive the discovery track for the platform: leading technical analysis, solution architecture, system diagrams, and technical documentation that shape delivery before implementation begins.
- Lead cross-team data integration initiatives on AWS (S3, SQS, Elasticsearch), migrating pipelines to Parquet-based flows and improving reliability, observability, and performance.
- Spearhead MVPs and platform standards, including a vendor-agnostic feature-flag architecture (Amplitude Experiments PoC) presented to Director/VP-level stakeholders.
- Designed and shipped Peer Finder, a conference networking tool (Next.js, SSR, SWR, complex form state), enabling EPs to manage peer connections at Gartner conferences, resulting in widespread adoption and high impact.
- Refactor legacy projects to modern standards with strong quality gates: unit and e2e testing, CI/CD automation, and Agent Coding/MCP-assisted workflows.
- Conduct technical interviews and mentor engineers, driving engineering best practices across teams.

Senior Software Engineer

July 2022– March 2024

XING/New Work SE · Barcelona

- Owned and built the frontend development and architecture of the B2B job-ad creation platform, a high-traffic microfrontends ecosystem with strict quality and scalability standards.
- Decoupled legacy monolith features into scalable microfrontends (React, TypeScript, Node, Storybook, ArgoCD) with full unit and e2e test coverage.
- Mentored, coached, and supervised team members, reinforcing best practices and code quality.

Frontend Team Lead / Full-Stack Engineer

December 2018 – July 2022

Leadtech Group · Barcelona

- Led a frontend/full-stack team building multiplatform B2C products; owned talent selection, retention, mentoring, and career-development plans.
- Acted as the technical point of contact with stakeholders including C-level, aligning engineering roadmaps with business priorities and reporting on delivery.
- Designed cross-platform architectures (React, Gatsby, TypeScript, Flutter, Firebase, serverless) focused on scalability, performance, and design patterns.
- Delivered new projects end-to-end as a full-stack engineer (React, Gatsby, GraphQL, Redux, Docker, Jenkins), making independent technical decisions and running team training and onboarding.

ADDITIONAL EXPERIENCE

Technical Mentor — MentorCruise & Codementor

2020 – Present

Frontend Developer — Grup Peralada

April 2017 – December 2018

Web Developer — Malabars

April 2016 – April 2017

EDUCATION

MSc in Reservoir Geology & Geophysics — University of Barcelona

Geology, Geological and Earth Science — University of Barcelona

Higher Degree in Web Application Development — STUCOM Centre d'Estudis

LANGUAGES & AWARDS

- Catalan & Spanish (native) · English (full professional) · Italian (conversational)
- Exceptional Rating (X) in 2025 Performance Review

SELECTED PROJECTS & OPEN SOURCE
